Virginia Education Assessment Collaborative

The Virginia Education Assessment Collaborative (VEAC) is an outgrowth of several collaborations taking place between Educator Preparation Programs (EPP) in the Commonwealth of Virginia. The purpose of VEAC is to provide a centralized assessment structure for Virginia EPPs that standardizes and reduces the complexity of data collection for both the Virginia Department of Education (VDOE) and the Council for the Accreditation of Educator Preparation (CAEP).

Data Collection Process

VEAC partners submitted contact information for program completer's employers to VEAC in January 2020. Initial recruitment for the survey was conducted on July 30, 2020 and was open with reminders through late September 2020. Due to COVID-19, VEAC extended the timeline for data collection in the employer survey.

Survey Response Rates

For our 2019-2020 Pilot, VEAC fielded the Employer Survey to 1902 employers from 17 of the 18 EPP pilot participants who provided contact fields for program completers' employers.

Upon closing the survey in September 2020, VEAC collected 488 (25.66%) complete and partial responses. Related to the 14 InTASC/VUPS items, VEAC collected between 441 (23.19) to 456 (23.97%) responses. On the overall satisfaction item, VEAC collected 457 (24.03%) employer responses.

On the optional open-ended item, 201 (10.57%) employers provided a response to the open-ended items.

For University of Virginia, the EPP had a 30% response rate on the VEAC Employer Survey based on the total number of contacts submitted to VEAC minus the number of failed/bounced emails. Note that VEAC and University of Virginia worked to correct the number of bounced emails via list revisions.

Overall Program Satisfaction

This section addresses the overall readiness item in the VEAC employer survey. Specifically, the item asks employers, "Based on your experiences with this teacher, what best describes the extent to which they were ready to meet the needs of students in your school?" Respondent employers could respond "Fully ready (able to have an immediate impact on student learning), Mostly ready (able to successfully meet the needs of most students)," "Moderately ready (in order to be successful, needed additional training, support, and coaching beyond what is typically provided to beginning teachers)," "Minimally ready (limited success meeting the needs of students and improving outcomes even with additional supports)" or "Not ready (unable to meet the needs of students even with additional supports)." On this overall satisfaction item, there were 457 responses collected.

To find the average overall satisfaction, responses are coded, from 1 to 5. Higher values indicate more satisfaction, and lower values indicate more dissatisfaction. Table 1 provides descriptive statistics on this scaled version of the overall satisfaction item.
