

VIRTUAL EVENT ROLES: EVENT MODERATOR

ROLE OVERVIEW

The Moderator manages communication to attendees during the virtual event. This person will provide instruction to the attendees and coordinate Q&A sessions.

PRIOR TO EVENT

Create an Ideal Space for Broadcasting

Visual Aesthetics

- Create a professional setting for your video, by selecting a neutral background wall in your home or you can use the Virtual Background feature to change your background. Using the School of Education and Human Development logo will ensure a professional look. Check out these [EHD specific options!](#)
- Lighting should be bright and even and preferably come from in front of you. Lighting should never come from behind you (e.g. a lamp or window), which will cast shadows on your face.
- Keep your attendees connected by looking at your webcam instead of your screen. This will give the effect of eye contact and visual engagement. Use the gestures and mannerisms that you would typically use in person.

Audio Aesthetics

- If you are using your computer's built-in microphone, ensure that you are no more than three feet away. If you have a pair of earbuds with a built-in microphone, that will often provide better sound for your audience.
- To prevent unwanted background noises, ensure that you are broadcasting from a quiet room and ask family members -- and pets -- to avoid disturbing you.
- Shut down your email and other applications on your desktop, to eliminate alert tones and other extraneous computer noises.

Internet Usage

- Broadcast your meeting from a location with strong bandwidth to avoid losing connectivity during the event.
- It's a good idea to ask other family members to minimize their Internet use during your event, to ensure that you have sufficient bandwidth for the broadcast.

Managing Zoom Meeting Tools

Communicating During Meeting

Depending on the access, attendees can communicate during the event by utilizing the chat window. By selecting the audience, you can share a message to everyone, with only hosts, or with someone specific. The contents of this chat window will only be visible to those who are selected. Chat messages can include advisories (for example, "One minute to start") or discussion of which questions to answer.

Sharing Visual Tools

You have the ability to share your screen in order to show a PowerPoint, photo, chart, browser window, or anything else on your computer that you want the audience to see.

- 1) If you intend to share your screen during your event, you will want to have everything ready on your computer in advance, because you will not want to have to go hunting around for things in real time.
- 2) To share your screen, click the "share screen" icon at the bottom of the Zoom window, select the item on your desktop that you want to share, and then click "Share."
- 3) When you share your screen, a mini control panel will pop up at the top of your computer screen.
- 4) When you are finished sharing your screen, you simply click the red "Stop Share" button.
- 5) If you intend to share your screen during your event, it's best to practice this a few times so you can do it seamlessly. We will do a run-through prior to our event.
- 6) It's important not to include embedded videos in your PowerPoint presentation, because these will not work well during a Zoom event. If you have videos that are an important part of your presentation, we can work together in advance to plan for them.

DAY OF THE EVENT

Moderator Day of Script

- Joins event 10 minutes prior to published start time
 - Turn off email and other applications to avoid alert tones
- Welcome and announcements to attendees
 - Brief event introduction
 - Expectations for the meeting
 - Share if event being recorded and where available at later date
 - Reminder to attendees to mute if not speaking
 - How to ask questions
 - Any announcements
 - Introduction of speakers
 - Content shared
 - Q&A time (either throughout event or at end)
 - Share final remarks to help you end your session smoothly and concisely.
