Welcome to Virtual Camp!

Getting Started

Getting started is easy! Follow these quick steps and you'll be ready for camp.

1. Google Classroom: Check your email for an invite to your course's Google Classroom site. Log-in and take a quick look! This is where you will meet with your educator, your challenges will be posted here throughout the week, information displayed, and where you share and interact.
2. Explore Your STEAM Toolkit: Your toolkit includes your tools for the week. These will be used multiple times, so take care of them. Go ahead and open any of the tools, this will help you get building on Monday!
3. Materials: Tempting, but DO NOT open the workshop bags. They are each labeled with the day and the workshop number. There is also an insert that has the workshop and the items included. Your educator will instruct you when to open these and what tools to use. Keep the workshops in the large box, that box will be used in a later activity.
*What's not included: one hardboiled egg and an ice cube.
4. Identify Your Workspace: Find a place where you can build, cut, glue, and assemble your projects. Have your materials, tools, and device staged and ready to go!
